

045 Gymleco Pendulum Squat

010 series, Plate Loaded machines

Gymleco's Pendulum Squat machine is incredibly well designed for heavy and durable training for everyone. The combination of a large range of motion, correct movement throughout the training and a wide, non-slip foot plate makes this a unique leg machine. Probably the most stable and space-saving pendulum squat available. In addition, Gymleco's Pendulum Squat has an easier starting position, which makes it possible for everyone to use the machine, both daily exercisers and trained athletes. Training in this machine is gentle on the back and hips. The large foot plate allows for great variation in your leg position and the training becomes gentle on the knees.

With the included weight hangers, it is easy to load and unload the weight plates, which means that the gym stays in order and weight plates do not end up on the floor.

- Standard frame color: Black
- Standard cushion color: Black / Red
- 2 Weight hangers for plate storage
- Easy to use for anyone
- Easy and light starting position
- Gentle on the back, hips and knees
